The Easy Way to Relax

ESCAPING THE STRESS TRAP IN 20 SECONDS
 THE SCIENTIFICALLY PROVEN RELAXATION TECHNIQUE

Date of publication: April 12, 2023

Deeply relaxed in 20 seconds

The innovative training "Easy Relax" makes it simple to become calm and composed in stressful situations quickly, intensively, and in a well focused way in 20 seconds. A vicious circle of stress and its associated problems can be interrupted at an early juncture – with well-being, overall health, and personal fulfillment benefiting enormously. The technique can be applied anywhere: not only on the yoga mat at home (where one is usually quite relaxed in any case) but also, for example, in the car or at work, even during high-tension meetings or over the course of demanding projects. The "Easy Relax" technique can be mastered in several steps. Each particular relaxation exercise builds on the previous ones, and these are progressively made shorter so they can be easily practiced during daily life.

The end result is the ability to relax quickly and intensively even in highly stressful situations – before the stress trap snaps shut.

- How to deal with stressful situations in just 20 seconds
- Scientifically tested – proven effective by numerous studies
- A specially developed training by the renowned psychology professor and coach Eva Asselmann

BAS KAST

A Compass for the Soul

THE FINDINGS OF NEW STUDIES ON RESILIENCE AND INNER STRENGTH

Date of publication: March 01, 2023

4-colour throughout, with illustrations

Nutrition, exercise, meditation, psychedelics, and more: 10 scientifically proven ways to keep body and mind healthy

Pandemics, crises, stress, and anxieties about the future – things aren't going too well for our psychological well-being at the moment. Bestselling author Bas Kast explores the question of what we can do to strengthen the soul and regain inner balance. He studies how nutrition and mental health are connected, and considers how physical exercise, nature experiences, and even exposures to heat and cold can revitalize our psyche. Having attended intensive meditation courses and self-tested the healing power of consciousness-altering substances, he ponders whether the recommendations of ancient philosophers to find peace of mind still apply today.

In his "Compass for the Soul", Bas Kast uses the latest scientific findings and what he has learned from self-experimentation to reveal which physical and psychological factors must work together in the process of strengthening our mind and spirit. He presents ten simple and sometimes surprising strategies for revitalizing body and mind in every phase of life for achieving confidence, and for regaining balance with ourselves and the world.

Inherited Fate

HOW TO OVERCOME STRESSFUL FAMILY PATTERNS AND RELEASE OUR TRUE POTENTIAL – THE COMPREHENSIVE PRACTICAL PROGRAM

Date of publication: April 20, 2023

Rights sold to: Romania (Trei)

Recognizing and resolving transgenerational trauma and blockages in the family system

We all have embedded within us inborn experiences, inherited pain, and ancient survival programs. These wounds, passed down through generations, can trigger anxiety, depression, relationship conflicts, and a range of physical symptoms. We intuitively sense that they don't have their origins in our own life history. Instead they are caused by tacit agreements – in effect 'loyalty contracts' – that we have made with our parents when we were still children, and which released our parents from the burden of our common ancestors. But within each of us there is also a deep knowledge of healing.

Sabine Lück, a psychotherapist and expert in transgenerational transmission, has developed a unique, comprehensive program for self-healing. The exercises, which have proven themselves effective in her practice, will help take us on a journey back into our own life story and those of our ancestors, and aid us in uncovering family secrets and becoming conscious of any blocking and disruptive life patterns. Through this, entanglements can be dissolved, step by step, to liberate our own potentials.

No! – A No Is a Yes to Yourself

SETTING BORDERS – A CRASH COURSE FOR BEGINNERS

Date of publication: June 14, 2023

Reference Books, Love & Relationships, Reference Books, Personal Development

Publishing House: Heyne
 Format: Paperback
 Pages & Size: 192 | 11,8x18,7 cm
 Original title: Nö! – Ein Nein ist ein Ja zu dir selbst

Whoever can say "no" gets more out of life

"Could you ...?" "Would you ...?" "May I just ...?" Who hasn't experienced it: we often say "yes" to such questions when we don't even really want to – and then get upset at ourselves. Why is it so difficult to set clear boundaries, to just reject all the crap and nonsense we are confronted with in our daily lives – in relationships, with friends, at work. To simply say "No!" to things we aren't in agreement with?

Paula Lambert knows all about this. The popular sex and relationship counselor was herself at one time a "yes woman": always ready to cater to the needs of others, but not her own, always there for others, but not for herself. The consequences were similar to those of many other women: lousy dates, miserable relationships, negative self-image, lack of happiness. That is, until she decided to change all that and treat herself with respect. And learned to say "No". Is this one of the hardest words to say? No, not at all! It's easier than you might think – and here's how!

- Whether in family, friendship, or job – those who say "no" more often, instead of trying to please everyone, live happier lives

The Art of Clever Argumentation

RULES FOR EFFECTIVELY ENGAGING IN DIALOGUE

A CRASH COURSE IN RATIONALITY

Date of publication: June 28, 2023

How to expose errors in thinking and have productive discussions

Haven't we all thought the world would be a better place if certain people changed their minds? And have those people, without exception, never been ourselves? In times of polarized societies, filter bubbles, and viral storms, many people have forgotten what it means to discuss things rationally and on a factual basis. We no longer know how evidence should be used or when to abandon a position. Instead, we celebrate exceptions and make connections where there are none.

Reto Schneider takes a look at how opinions are formed and provides his readers with simple rules that can be used to independently consider arguments on their own, to avoid errors in thinking, and to unmask those who are talking nonsense. This entertaining and inspiring read invites us to examine the reasons for differences of opinion while at the same time to review our own attitudes – so that we can again finally have open and unprejudiced conversations.

- Psychological principles for a better culture of conversation and dialogue
- With many examples of typical conversation situations
- Current, socially relevant, and comprehensible

Body Language Doesn't Gender

UNDERSTANDING FEMALE AND MALE SIGNALS – AND EFFECTIVELY MAKING USE OF THIS

Date of publication: March 15, 2023

With 80 b/w illustrations

The end of genderised injustice – how body language is the key to equality

How often do we feel unfairly treated: "Why does she want him – and not me?"; "Why does he get a higher salary – and I don't?" We readily find something blame: society in general, our upbringing, or even the opposite sex! But we tend to overlook the fact that we ourselves have subconsciously contributed to this. In his new book, Stefan Verra challenges us with the insight that our bodies – regardless of gender – essentially speak the same language. But so often we use our body language incorrectly, use its signals in the wrong context or in inappropriate situations. With a good dose of humour, Stefan Verra guides us through the vocabulary of body language and teaches us how to get our bodies not to disagree with our words. Well-founded, practice-oriented, and easy to implement – this is how gender equality really works!

- Understanding others, making a better impression – clearly explained and comprehensively illustrated
- From the premier body language expert – witty and entertaining

Things I Wish I'd Known When I Started

WHY WE DON'T ALL HAVE THE SAME OPPORTUNITIES WHEN STARTING OUT ON OUR CAREERS – AND HOW WE WOMEN CAN SUCCEED DESPITE INEQUALITY

Date of publication: March 01, 2023

An insider's guide to women starting out on their careers

There are many reasons why a woman's career might stall – often even before she becomes a mother and ends up in the "part-time trap". During the first five years of her career, a woman will encounter obstacles that her male colleagues don't have to contend with, and which ensure that German companies' senior management teams and boardrooms continue to be dominated by men. Mirijam Trunk was 27 when she became managing director of Bertelsmann's podcast production company Audio Alliance, and 30 when she became RTL media's Chief Crossmedia Officer. Every day, she saw how role models and traditional notions of gender, ingrained behaviour and limited networking structures created workplace inequality, and how both men and women failed to create change. In this book, which is based on her own experiences, Trunk reveals the obstacles women often encounter at work, and provides practical advice on how to overcome them. "Things I Wish I'd Known When I Started" gives early-career women the ammunition they need to avoid common pitfalls, sidestep old-fashioned structures and clear their path to the top.

GERNOT RÜCKER

Intoxication

WHAT WE NEED TO KNOW ABOUT DRUGS AND HOW THEIR USE CAN BE MADE SAFER

Date of publication: June 21, 2023

"Our society has a dangerously incomplete conception of drugs – especially of alcohol."

"We owe a lot to intoxication," says Dr. Gernot Rücker, because without the discovery of intoxicants, humankind would not have been able to develop as it did. Our first intoxicant was sugar, which makes it clear that we all intoxicate ourselves – some more and some less. But there is no real understanding of which particular intoxicant puts us in which state. Instead, we resort to the legal intoxicant, which is unfortunately the most fatal: alcohol.

Dr. Gernot Rücker pleads for new legal ages for intoxicants and for the legalization of particular intoxicating drugs – so that we as a society and as individuals can continue to experience what benefits there may be. In this book, he shows the ways alcohol is so lethal but is legal nevertheless, why cannabis, though illegal, is actually the most harmless intoxicant, and what a future with a spectrum of legal drugs might look like.

- Humans need intoxication for their development – with legally available, uncontaminated, and monitored drugs for every need

No more fatigue! Finally more energy for life

Listless, weary, exhausted? It's no wonder, as these days we are having to struggle physically and mentally more than ever. The result: burnout, fatigue, constant exhaustion ...

The physician and best-selling author Dr. Ulrich Strunz shows that, when epigenetically optimized, our body is a miracle. The more energy it consumes, the more it produces. ATP is the name of the chemical compound that provides energy for all our cells. On a physically strenuous day, we convert the equivalent of our entire body weight into ATP – up to half a kilogram a minute. Dr. Strunz explains the amazing potential of energy metabolism and provides numerous tips and exercises on how to use and to boost this practically inexhaustible source of energy, so that we can get through each day with more energy!

- Dr. med. Ulrich Strunz exposes what is draining our energy and explains how energy is created in the body

SIMPLE EXAMPLES AND HELPFUL INSTRUCTIONS – FOR CHILDREN FROM SIX
TO TEN

Date of publication: May 24, 2023

Puzzle magic and brainteasers are great fun!

Solving problems using logic is great for kids as it will make them smarter, teach them concentration, and boost their self-esteem and confidence in their mental abilities. A positive co-benefit of puzzle magic is that the attention adults give their children by solving puzzles together promotes bonding in a very special way. Because they enjoy the thrill of solving puzzles and riddles, children can become intrigued and inspired by logic and scientific relationships, even at an early age. In his guide filled with anecdotes, Frederic Friedel encourages parents to challenge their children with tricks of logic and puzzles at an early age. Here are plenty of crazy and sometimes nonsensical stories and riddles that will get kids thinking.

There Are No Unreachable Kids!

HOW TO STAY IN TOUCH WITH OUR CHILDREN – SUPPORT DURING PUBERTY

Date of publication: March 01, 2023

Seeing stormy times through together

What to do when children no longer want to be involved? When there are no longer even heated arguments because they have completely withdrawn and you feel you can no longer communicate with them at all? In such situations, Jesper Juul recommends reconsidering your own attitude. He fervently advocates avoiding labeling any child "difficult" or simply giving up on them. Even when faced with adolescents who are completely out of the norm, it is still possible to have genuine dialogue. Parents, schools, and all who deal with children must take on their responsibility instead of placing it solely on the children. Even before puberty, a relationship at eye level is necessary. When adults present themselves as calm and composed "sparring" partners, they will be able to reach out and connect with children and adolescents and accompany them in life in a trustworthy and empathetic way.

- A previously unpublished book by the renowned bestselling author
- Over 1.6 million copies of Jesper Juul sold in German-speaking countries
- Supportive, stimulating, provocative
- With many illustrative examples and answers to urgent questions

Small children – big questions!

In the first years with baby and toddler, many parents ask themselves the standard questions about health and development – but answers are often not so easy to come by. There is not enough time at the pediatrician’s office, and the Internet is teeming with sometimes contradictory information. And just whom do you ask when your baby is feverish for the first time on a Saturday night? There are also the many everyday questions, especially for first-time parents. Why is my baby crying? Does my baby really need all the recommended vaccinations? How do I strengthen my child’s immune system so that they don’t get ill all the time? When will my child finally sleep through the night? What should I pay attention to when buying the first shoes? Is it normal that my child is still not crawling? Or not walking? Or not talking? The pediatrician Dr. Nikola Klün has the answers to all of these questions in this new guidebook for parents.

- Answers to the most important everyday questions for the first three years of childhood
- Empathetic advice from the pediatrician and mother of two

Happy as a Couple, Happy as a Family

STRENGTHENING RELATIONSHIPS, DEFINING COMMON VALUES, FOSTERING INDIVIDUALITY

Date of publication: January 18, 2023

With 20 b/w illustrations

“Couples need relationship knowledge!”

Many couples face a tough test. In the beginning of the relationship, they believed there would be very few challenges, and even those few were rarely discussed. Not very many couples would develop a clear vision in time to spot the dangerous shoals and reefs they would encounter after the initial infatuation phase. The divorce rate alone speaks volumes. In addition, as a result of the pandemic, a new normality in everyday life has evolved that revives role models long thought to be outdated and that brings to the fore underlying conflicts from which everyone involved suffers – especially the children.

This book provides the necessary support for answering essential questions. How can roles in the partnership be reconsidered? How can partners become clear about their own needs and wishes, and how can they share them? With children, how can the relationship endure through the exhausting baby phase, the no less exhausting puberty phase, and on top of that, lockdown and homeschooling?

- Everyday-tested advice book with numerous case studies and discussion guidelines, for all areas of family life – talking, loving, eating, raising kids, working, living together

I Feel What You Are Not Seeing

HOW YOUR CHILD EXPERIENCES THE WORLD AND HOW A CHANGE OF PERSPECTIVE CAN BENEFIT THE ENTIRE FAMILY

Date of publication: March 29, 2023

2-colour throughout

What would children say if they could put their feelings into words?

Carina Thiemann, educator and founder of "Weltvonunten", shows in her knowledgeable and empathetic guidebook just how children experience their everyday life, including the problematic times: the tantrum at dinner after a long day at daycare with its demands for cooperation from the child, dawdling when changing clothes because the child is thinking about what he or she had just been playing, or rebelling at the new skin lotion because it is so cold and smells strange. Through a change of perspective, parents will quickly and vividly feel what it really means to be a child in this modern world. They will recognize and understand the demands and difficulties behind their children's behavior, things parents rarely recognise during those stressful and recurrent conflict situations in everyday life. Carina Thiemann shows in a practical and true-to-life way how parents can perceive their child as fellow human beings, presents how to avoid getting into power struggles, and suggests creative ways for peaceful parenting that accommodates the needs of all family members.

- An original, empathetic, and moving approach – understanding your child better through a change of perspective
